

UV disinfectant lamp Sanit36Q

WHAT IS UV-C LIGHT?

UV stands for ultraviolet light. Ultraviolet light represents the frequency of light between 100 nanometers (nm) and 400nm . Within the UV spectrum lie three distinct bands of light: UV-A, UV-B and UV -C.

UV-A (400nm-315nm): The long wave UV light (315nm to 400nm) or UV-A refers, to what we commonly call "black light." This is the longest wave length region and has the lowest energy. UV-A represents the largest portion of natural UV light.

UV-B (315nm-280nm): The UV-B (280nm to 315nm), or mid-range UV, causes sun-burn.

UV-C (280nm-100nm): The germicidal UV light (100nm to 280nm), or UV-C, is effective in microbial control by cutting off RNA and DNA of bacteria and viruses. Scientific research has proven that the most effective frequency for microbial destruction is between 280nm and 200nm, which is within the UV-C band. Therefore, as long as the nm frequency of a germicidal lamp is provided within that range like , the microorganisms will be destroyed effectively

The ATLANTS Sanit36Q UV Sanitizing Lamp provides effective protection against germs, viruses, bacteria, dust mites and mold throughout your home, office or business

Ideal for sterilization, disinfection and air purification of spaces up to 40m2 / unit, covers 360°, without blind spots

Regularly used in your home, office, hairdressing salon, shop, hotel, restaurant, bathroom, kitchen, bedroom etc. to disinfect, it will protect people without the use of aerosols or aggressive chemicals.

CHARACTERISTICS

Naturally kills germs and viruses that cause colds, flu, infections, asthma, and allergic reactions.

Destroys more than 99.9% of E. coli and other bacteria.

Chemical free and odorless.

No harmful waste, ecological

A hypoallergenic way to disinfect a place

Safe and easy to use

Silent operation

USE GUIDE

Method 1:

Press the key to start and leave the room. The lamp will start working in 10 seconds. After completing the disinfection according to the time selected by the user (15', 30 or 60'), the UV lamp will automatically return to the off state.

Method 2: wireless remote start

Select the time and press the key on the remote control to start. After confirming that the disinfection lamp is on close the door of room. The UV lamp will automatically return to the off state when finalised disinfection

If you need to temporarily suspend disinfection, you can use the key on the remote control.

Disinfection time:

10m2: 15min

20m2: 30min

40m2: 60min

In high traffic areas, shops, schools, public offices, public transport vehicles, hotels, etc ... it is recommended to disinfect every day.

Technical characteristics:

Power: 36w

Type: Quartz UV-C Lamp

Power supply: 220V AC

UV Wavelength: UV-C (253.7nm)

Product Weight: 1.5 Kg

Product measures: 50 * 20 cm

Individual packing: 23 * 23 * 53 Cm

Packing size: 116 * 47 * 56 cm / master pack.

Quantity: 10 pieces / master pack

Remote control

Ref. ATL-SANIT36Q

SANIT36Q UV Disinfection Lamp provides comfortable and effective protection against germs, viruses, bacteria, dust mites and mold throughout your home, business or office
