

# RADARSUN

## Solar powered alarm with motion sensor & super bright led light

100% SOLAR POWERED , RADARSUN is a useful device with a motion sensor, noisy wireless alarm and super bright led lamp

Use it as intruder detector & banisher anywhere or as automatic lamp for entrance, closets etc.. By selecting only led lamp option

When outdoor placed, it is automatically charged by sunshine thanks to the built-in solar panel.

**Indoor use:**  
Solar panel + battery module can be removed from unit to be recharged by the sun and used in indoor applications

### Options:

**Alarm + light mode:** the alarm sounds & light on automatically when anyone approaches the detected zone . The siren & lamp will shut off automatically after a while and reset itself.

**Light mode:** the light on automatically when anyone approaches the detection zone , ideal as entrance light, parking light, closet light, silent security light, corridor light... Very efficient, operating time:

Light mode: Around 400 times after power full charged.

Light+alarm mode: Around 200 times after power full charged.

This 100% solar powered motion detector alarm sounds whenever someone comes within the range of the infrared zone when alarm mode is on

The zone detection coverage is 120 degrees horizontally and 75 degrees vertically

Alarm Sound Level: Over 100dB. Detection range 0~8 meters.

Very easy installation & no maintenance: Mount the adjustable angle wall mount bracket in the desired location with screw and screw anchor (provided). The loud, motion activated alarm & light alerts you whenever someone breaks into the detection zone. Use at home or at the office, business, shop, warehouse...

Indoor and outdoor application, no cables, fully resistant to power cuts, fortuitous or not. Weather proof - IP65. White LED: 12 pieces

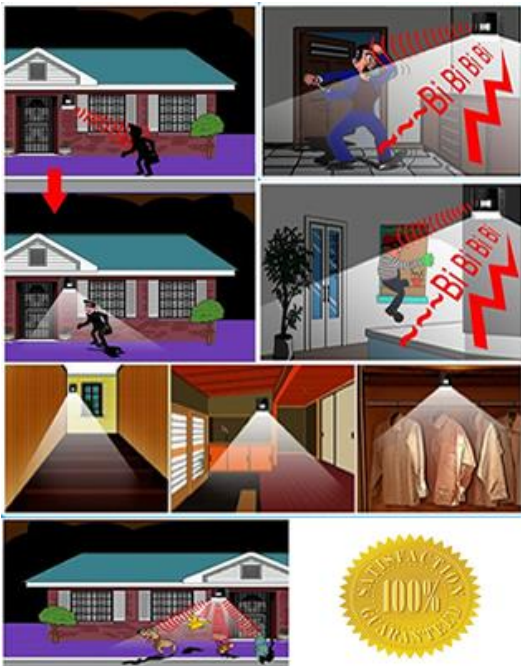

Uses 3 "AAA" 350 mAh rechargeable batteries, included.

Size: 116x66x87mm.

Ref.ATL-66
