

InstaLite 60000

ALL IN ONE SMART SOLAR LAMP

Technical characteristics:

Power source: 90W/18V integrated solar panel mono crystalline .

Light source: 60W LED

Super brightness: 7500 lumens .

Construction: aluminum alloy.

Support brackets included .

Energy saving mode .

After fully charged it can work up to 12h/

night. High efficiency: It can be charged

in only 5-6 hours of good sunshine.

Visible angle: 120° .

Working temperature : -30° to +65°C .

Last generation lithium free maintenance

battery 50ah/12V with long life span.

Suggested Installation height up to 9m .

Color temp. range 2700-7000k (upon

request)

IP: 65 .

Product size: 122* 47 * 15 Cm.

Packing Data:

G. weight: 24 Kg.

Export master carton:6 units.

Size: 135 x 56 x 132 cm.

G.W. master carton: 150 Kg

Carton Volume: 1 Cbm.

20' /40FCL loading: 180pcs/360 pcs.

REF. ATL-INSL60000

Fully integrated light fixture with everything needed to run the light contained completely within the lamp itself.

Installation is as simple as mounting the fixture in the desired location and switching it on . With light sensor and auto mode (on dusk to dawn automatically) .

Ultra compact design housing .Modular design. No wiring, assembly or maintenance. Durable construction in alu, rust-proof, dust-proof and waterproof.

100% sun powered - No electric bills!. No power cables, no trenching through existing roads, sidewalks or landscape.

It eliminates cost of utility installation to site - allows flexibility of location. Environmentally friendly reduce fossil fuel consumption , eliminating pollution

Minimum maintenance required . Reliable operation 365 days a year. There is no need to install a wire or dig the road.
