POLYVALENTS REFRIGERATORS AND FREEZERS OPERATED BY GAS/ELECTRICITY/ KEROSENE / BATTERY / SOLAR

Polyvalent gas/electricity refrigerators are a perfect solution for cabins, RVs, Boats, farms or anywhere where alternative energy source is required

Polyvalent absorption refrigerators use less energy, are portable, durable, and flexible by design.

Polyvalent absorption refrigerators have no moving parts. They have no compressors, no motors, fans or other moving parts to wear out. There will be no motor turning on every 15 minutes!

We offer major lines of polyvalent absorption refrigerators. These are great to use in your cabin, guest house, or anywhere electricity is in short supply.

These wonderful polyvalent absorption powered units come with a full range of functions and features. Be it for a permanent installation or the most portable units for the most active lifestyle, there is a unit for your needs. Keep the drinks cold for the whole team at the game, enjoy peace of mind as you camp, or simply replace an existing unit. Keep your food safe from bacteria and spoilage when you are enjoying the world outside.

Our polyvalent absorption refrigerators will meet the needs of even the most demanding environments!

Atlants offers several sizes of high quality REFRIGERATOR top mount refrigerator/freezer combo units. Made with the highest quality workmanship. ATLANTS is proud of the high performance and high quality of these deluxe refrigerators.

The interior includes glass shelves, Crisper Drawers big Size Door Shelves. Other features include Reversible Doors , Piezo Ignition, and Heavy Duty Adjustable Levelling Castors. This fridges are rated top level performance and top notch workmanship.

Freeze the day's catch fresh on the boat, serve to the entire scout troop (even in the wild!), or keep beverages frosty cold.

Smaller models are compact and easy to transport, its powerful cooling unit makes them perfect for cottages, campsites, cabins, vacation homes, patios, boats and RVs . Larger units are a must in any farm , tent or any area where electrical supply is not good or simply , inexistent.

Some models use three different power sources- Runs on LP gas, 12V battery, or 120V electric.

Easy-to-reach controls , smooth, rustproof steel cabinet now with rounded corners and enamel finish

ATLANTS

We also offer other appliances like wine cellars, bottle coolers, car fridges, portable fridges 3 ways, caravans fridges/freezers, for cosmetics, vaccines, medicines, coolboxes, minibars etc.,,

ATL50B***

One door fridge
Capacity 42 L.
Built-freezer
Dimension (W*D*H)
mm 500*570*536
Net weight 25Kg
Gross weight 27Kg
Voltage 110V or 220V
or 12V
Can be supplied for
working by GAS
(propane, butane,

metane, natural)
Performance
Consumption (kw/24h) 0.7
Gas Consumption 350
Gm/24h
Colour White

**Compact design
Energy efficiency
No noise, dual function**

ATL95*****

Double door fridge & freezer
Total capacity: 90
litres
Fridge capacity
75L.
Freezer :15L
Dimensions
(W*D*H)
515 x 555 x 1040
mm
Net weight 35
G.weight 38 Kg
Voltage 110V or
220V or 12V
Can be supplied
for working by
GAS (propane,
butane, metane,
natural)
Performance
Consumption (kw/24h)
1.1
Kerosene
consumption:
1L/24h Gas
Consumption 550
Gm/24h
Colour White

**ALSO KEROSENE OPERATION
AVAILABLE. POWERFUL
COLD PRODUCTION**

ATL75***

1 door fridge
Capacity 75Liters
Built-in freezer
Dimension
(W*D*H) mm
515*560*750
Net weight 28
Gross weight 30
Voltage 110V or
220V or 12V
It can work by
GAS or
GAS+ELECTRIC
Performance
Consumption
(kw/24h) 0.9
Gas consumption

450 Gm/24h

**SILENT OPERATION—
MICRO FOAM TECHNOLOGY
-ICE MAKING**

ATL183*** TROPICALIZED**

DOUBLE DOOR FRIDGE
**Total capacity: 200
litres**
Capacity fridge 165 L .
Freezer 35 L
Dimension (W*D*H) mm
595*735*1200
Net weight 47 G.weight
54 Kg
Voltage 110V or 220V or
12V
Can be supplied for
working by GAS
(propane, butane,
metane, natural)
Performance
Consumption (kw/24h) 1.1
Kerosene consumption:
