

Practical and Ecological, This solar shower, once connected to a water source, will provide hot water to you all the day. Installed near your swimming pool this solar shower will remove your skin from the “toxic” products such as chlorine or brominates contained in your pool

Moreover equipped with a mixing tap your shower will be done at ideal temperature.

Manufactured aluminium this column **resist ALL**, extreme temperatures, solar radiation, shocks, acid rains and does not become deformed.

Simple and Fast installation. Only four screws (provided) and a connection with a sprinkler pipe is all required for its installation.

ATLANTS only offers top-of-the-range solar showers. Drawn, conceived and manufactured for ATLANTS, the showers solar combine design and quality.

Entirely out of stainless, resolutely aesthetics, robust and useful, they will naturally find their place close to your swimming pool, in your garden or on your terrace.

It does not matter the position of the sun, the whole of the column (which acts as tank from 32 to 62 litres) collects the rays (360° exposure) and quickly makes it possible to heat water (until 60°) and to keep it hot.

Thus, throughout the day, the system makes it possible to take many hot showers and this starting from a simple cold water supply (standard sprinkler pipe) connected at the base of the column
